

EXTENDED METERING OPTIONS

Page 1 of 34

DESCRIPTION OF SERVICE:

The Company will provide the following Extended Metering Options to Customers and Suppliers.

Option 1 - Distribution Company Owned Phone AMR Metering - Provides the ability to remotely obtain a Customer's hourly usage data through the use of telephone lines. The Company will own and provide advanced metering services to a Customer by purchasing and installing advanced metering equipment capable of recording the Customer's 15-minute interval usage. The Company will read the recording equipment daily through phone lines and use the data for ISO reporting. The two choices are:

- ?? Phone Automatic Meter Reading Metering (1a)
 - ?? Dedicated Phone Line
- ?? Late Night Telemetry (1b)
 - ?? Shared Phone Line

Option 3 - Load Pulse Outputs for Customer or Energy Suppliers Equipment - Provides real time analog Customer load information which can be interfaced to their own energy monitoring or management system or external telephone access recording equipment. The Company will own and provide advanced metering services to a Customer by purchasing and installing a pulse interface device that will be attached to the Customer's meter. The Customer may purchase and install a Company approved modem-equipped 15-minute interval recording device to be connected to the pulse interface device that will be read daily by the Company and used for ISO reporting.

FEES:

The Customer and/or Supplier has the choice of a One-Time Fee or a Monthly Fee.
